

Adoption of ICFRA Targets and Marking/Score Indication System

ICFRA Scoring System

The NRAA has approved the adoption of a modified version of indicating scores on ICFRA targets. ICFRA Targets have been now universally adopted and approved, and a modified version of indicating scores which incorporates Super V's has been approved, effective immediately as from 1st March 2011.

It will take some time for the ICFRA Target Dimensions and the Marking/Scoring System to be integrated into the SSR's. In the meantime please use the system as indicated on the diagram below. Some States have already been using it for some time.

A description of the Marking/Scoring System has been placed below.
